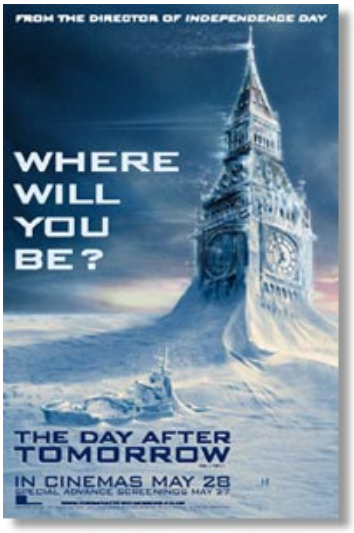
Science meets Hollywood

PRINTABLE VERSION

The Day After Tomorrow

A new Hollywood blockbuster, 'The Day After Tomorrow', is set for a worldwide release on 28 May 2004. The timescales depicted may be unrealistic, but some of the science behind the movie is real enough.

The Met Office Hadley Centre for Climate Prediction and Research is where the world's leading scientists study this very thing and advise Governments on what may happen and the risks involved.



Will we freeze?

Find out what the experts are really saying.
